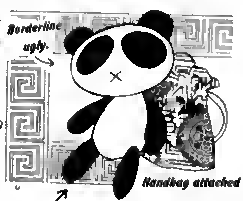
5 Letters...

Make me very happy. I've cherished and kept every letter I've received since I made my debut. Thank you so much! ♥ Receiving letters is the best. I have tried making sheets of paper for replies before, but I haven't done that for a long time. I'm sorry! When I become more efficient in using my time, I will start it up again. ♥

Well, after I started the AniYoko series, many people have been writing to me using letter pads with panda bears and bunnies. ♥ That is so nice knowing you all looked! There are some people who even include a little panda doll, so it's been too much fun! ♥ One thing I always wonder about is the fact that Iyo is always colored pink when drawn in the letters. Why? Do people automatically equate bunnies as pink? In my imagination, Iyo is white with brown spots. It doesn't really matter either way, but.

One more thing. Ever since we started the original series, we have been asking readers to send us their illustrations. I even receive the ones that don't make it to the magazine, and many are well done! It makes me happy. ♥ Thank you very much! It's a shame that some of them don't make it to the magazine just because they forgot to erase the pencil lines. That's often the only reason why they don't make it.



My favorite was a letter from the winner of my hand-made Issa doll with a little pouch

Address to send me letters can be found on p198
